

# DIGITAL PLANNERS

The Pharmacy Coach, LLC | [ThePharmacyCoach.com](http://ThePharmacyCoach.com)

Thank you for downloading the student digital planner! There's no better way to to succeed as a student than to be organized.

To start using your planner, save the PDF file to your favorite cloud service, one that you can access on your tablet (iCloud, Google Drive, OneDrive, Dropbox, etc.)

Then, follow these steps to access your new planner:

1. Open your note taking app. We recommend GoodNotes for iPad and Xodo for Android.
2. Navigate to the "category" where you want to put your planner.
3. Click the "+" at the top left corner of the screen, and choose IMPORT.
4. Choose the cloud service where you saved the file. It will be in your category as a new document.

**You're all set to use your planner!**

If you need more detailed instructions to help you use GoodNotes, check out [this page](#). (We don't get compensation from GoodNotes... we just really love it!)

Please show us how you're using your planner on Instagram [@pharmcoach](#)! Also, subscribe to us [YouTube](#) to get the latest drug and disease state reviews.

*This planner is for personal use only, and may not be resold or used in a commercial way. All rights reserved to The Pharmacy Coach, LLC and owner Amber Cann.*
